Career Objectives

Highly analytical and dedicated Computer Science student specializing in **Backend Development** using the **.NET/C#** stack. Proficient in **ASP.NET Core**, developing robust **RESTful APIs**, and implementing complex business logic. Possesses a strong command of database systems (**SQL Server**, Oracle) and core CS principles (OOP, Data Structures). Seeking a **Junior .NET Backend Developer** role to leverage technical expertise in **building scalable** and high-performance **server-side applications**.

Education

2023-2027: Faculty of science ,Alexandria university ,Computer Science and Statistics department CGPA:3.7

Core Academic Coursework:

Software Engineering & Programming Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms, Operating Systems (OS), Theory of Computation (TOC).

Web & Graphics: Web Programming, Human-Computer Interaction (HCI) – (UI/UX Design Focus), Computer Graphics & Rendering.

Advanced Topics: AI Search Algorithms, Introduction to Statistical Sciences.

Training And Courses

Digital Egypt Pioneers initiative (Jul 2025-Dec 2025) **Egyptian Ministry of Communications Software Development - Full stack .Net Web Developing**

Technical Overview: Acquired comprehensive full-stack development skills using the .NET ecosystem, focusing on building scalable, data-driven applications.

Mastered C# for robust Backend logic and RESTful API development.

Gained proficiency in front-end development using HTML5, JavaScript, and CSS3.

Experienced with .NET Core Web API and MVC frameworks.

Skills

Technical Skills

Primary Backend Stack:

C#, ASP.NET Core, RESTful Web API, MVC (Model-View-Controller), LINQ (Language Integrated Query), ProblemSolving.

Databases & Tools:

SQL Server (SSMS), Oracle, MySQL, Database Design, T-SQL (Transact-SQL).

Core CS Fundamentals:

Object-Oriented Programming (OOP), Data Structures, Algorithms, Operating Systems (OS), Logic circuits Design, Discrete Structure, SQL, AI.

Other Languages: Java, Python, JavaScript, Bash.

Tools & Version Control: Visual Studio, Visual Studio Code, IntelliJ, Git/GitHub.

Soft Skills

Effective Communication, Teamwork, Adaptability, Collaboration, Stress Management ,Emotional Intelligence , Self-Discipline.

Language Skills

English

Arabic (native)

Hobbies

Drawing ,travelling, writing stories, Math Games.

Projects

AbhaTop – Tourism Platform API (In Progress)

Technologies: ASP.NET Core Web API, .NET 9, Entity Framework Core, SQL Server, JWT Authentication, AutoMapper

- Developed a scalable backend API for a tourism platform supporting destinations, festivals, heritage stays, bookings, and e-commerce functionality.
 - Implemented Authentication & Authorization using JWT and ASP.NET Identity with role-based access control.
 - Built booking and availability management modules with transactional operations and booking status tracking.
 - Designed RESTful APIs using layered architecture principles and Entity Framework Core for database operations.
 - Contributed to modules including destinations, heritage stays, festivals, shopping cart, and souvenir management.
-

LEORE – Women-Focused E-Commerce Web Application

Technologies: ASP.NET Core MVC, Entity Framework Core, SQL Server, ASP.NET Identity

- Developed a full-stack E-commerce web application specialized in women's products.
 - Implemented secure authentication and authorization using ASP.NET Core Identity.
 - Built core business modules including product catalog, category filtering, shopping cart, wishlist, and order processing.
 - Designed and managed the relational database schema using Entity Framework Core and SQL Server.
 - Applied MVC architecture and separation of concerns to maintain scalable and clean code structure.
-

HR Management System

Technologies: ASP.NET Core, Web API, C#

- Engineered and implemented authentication and authorization features using ASP.NET Core Identity.
 - Developed RESTful API endpoints for HR modules including employees and departments.
 - Applied OOP principles to build modular and maintainable backend services.
 - Integrated an automated attendance system using proximity-based detection.
-

Comprehensive University Course Registration System

Technologies: Java, JavaFX, Oracle, CSS

- Developed backend logic and managed database schema and connectivity using Oracle Database.
 - Built a complete course registration system supporting Admin, Instructor, and Student roles.
 - Implemented course booking, user management, and data maintenance functionalities.
-

College Web Administration System

Technologies: PHP, MySQL, HTML, CSS, JavaScript

- Developed responsive frontend interfaces focused on usability and smooth user experience.
- Contributed to backend functionality and database integration using MySQL.
- Collaborated on building an administration system for managing college-related operations.
